DETAILED ACTION

Response to Amendment

1. The amendment filed on 21 May 2007 does not place the Application in condition for allowance.

Status of Rejections Pending Since the Office Action of 18 January 2007

2. All previous grounds of rejection are withdrawn due to Applicant's amendment.

Comments

3. The past two amendments submitted by Applicant have indicated the incorrect application serial number, which has caused delays in properly routing the amendment. Applicant is requested to indicate the correct serial number (09/689,010) in future correspondence.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 31-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed,

had possession of the claimed invention. There is no support in the specification as originally filed for a microchip "wherein the first side surface of the channel is adapted to concentrate the light emitted from the light guide to the side of the channel facing the optical element", as recited at lines 9-10 of claim 31. Page 14 lines 15-24 of the specification recite in part that, "the excited light is radiated in concentration to the light-taking surface 26a of the condensing optical element." This does not correspond to concentrating the light from the light guide *to the side of the channel facing the optical element*, but rather concentrating the light *to the optical element*, itself. For this reason, the cited portion of the specification is not considered to adequately support the new limitation.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
